HACK THE MOUNTAIN

It all started with a shared ambition: to unite PolyHacks and UdeMHacks to create an event that reaches new heights. Together, we envisioned Hack The Mountain as an experience where hundreds of students climb the same summit: to innovate, collaborate, and push beyond their limits.

Over the course of 24 hours, more than 400 participants work in teams to tackle technological challenges and develop creative solutions.

More than just a competition, Hack The Mountain is an immersive experience that promotes learning, collaboration, and networking between students and partners.

For this new edition of PolyHacks × UdeMHacks, it is essential that we keep the event **free** and **accessible to all** students.

Your support will allow us to provide meals, snacks, and prizes, ensuring an enriching, inclusive, and unforgettable experience for all participants.

HACK THE MOUNTAIN AND YOU

By joining Hack The Mountain, your organization becomes part of a leading technology event that drives innovation while championing diversity and gender equity in tech.

An Exceptional Community

Join one of the largest French-speaking student communities in North America.

A Bilingual Event

Place your organization at the center of a bilingual ecosystem (French and English), offering direct access to a diverse and highly qualified audience.

Exclusive Access

Meet students in computer science, engineering, technology, and more. Identify high-potential talent, recruit, and grow your network.

Elevate Your Brand

Showcase your organization to our community through your presence, your activations, and your promotional materials.
